I am a first-year Biomedical Engineering student at the University of Waterloo with strong communication, leadership and learning skills developed through leading teams of 70+ students, teaching in high-responsibility environments, and presenting to large groups. I adore translating complex ideas into clear, actionable information and prosper in collaborative, fast-paced settings.

Projects:

UWaterloo Biotron- Enable, December 2025 – February 2026

- Designed, prototyped, and tested a 3D-printed assistive device using SolidWorks + Bambu Studio to improve key usability for individuals with arthritis, considering grip force, hand placement and manufacturability.
- Designed, modeled, printed and tested, braille key caps for an individual with visual impairment.

Design project September 2025 – December 2025

- Followed engineering design process to increase accessibility of board games for children aged 8-11 with spastic cerebral palsy using design tools such as QFD, Pairwise, BOC, SWOT

Experience:

Engineering Club, September 2023 – June 2025

- Hosted meetings with 80+ students, Tripled average number of members over a 2-year span(10→30). Used Microsoft excel, in addition to Microsoft office and Google workspace tools to run programming. Managed budget, meetings and supervised other executives

Head Buddies, March 2024 - June 2025

- Co-created the application process including a written aspect and interview + built a team of 70+ student leaders to work with 250+ students. Met weekly to plan programming for grade 9's with sessions on equity, bullying, peer pressure, study habits, and more. Directed 12 leaders supervising in class sessions

Aquatics Instructor, October 2022 – September 2025

- Taught swimming, first aid and lifesaving with TAC sports. Worked with children aged 3-14 and improving systems within the company. Practiced metacognition skills and communication both with parents and students.

Shad UPEI, July 2024

- Participated in month long design project working on a solution for clean, affordable energy and energy reduction.

Skills:

Technical skills – SolidWorks, Z-Suite, Bambu Studio, Canva, Microsoft Excel, PowerPoint, Word, Design tools (QFD, Pairwise, BOC, SWOT), Google workspace tools, Lab experience with Polymers, Dialysis, Micro pipetting

Interpersonal skills – Positive influence/Leadership in team-based environments, attention to detail, conflict resolution, metacognitive, experience with public speaking, ENG SOC rep

Programming languages - C++, MATLAB

Other - Fluent in French and English, National lifeguard, Standard First aid and CPR-C, Ontario G2 driver's license, WHMIS certified, TCPS 2 certified

Awards:

Aubrey Rhamey award, June 2025

- Outstanding leadership in school activities

David Phillips Carpe Diem award, June 2025

- Willingness to help others and positive view on life

Leamen Memorial award, October 2024

- Presented annually to the grade 11 student considered by staff to be the best citizen

Valedictorian at Shad UPEI, July 2024

Education:

University of Waterloo, September 2025 – April 2030

- Candidate for a Bachelor of applied sciences of Biomedical engineering
